Pawan Singh Bhandari

Full Stack Developer

pawansinghb07@gmail.com Portfolio LinkedIn GitHub 9762383524 Pune, India

PROFILE

Computer Engineering student (2023–2027, CGPA: 8.6) and 3x Hackathon Winner. Experienced in building full-stack applications using React, Java, Spring Boot, Python, and REST APIs. Developed BroadSheet, a hackathon submission and judging platform, and EcoBounty, an AI-powered civic issue reporting platform. Experienced in backend development, database integration, API development, and deploying applications to cloud platforms.

TECHNICAL SKILLS

Languages — Java (primary), Python, JavaScript

Frontend — React.js, HTML5, Tailwind CSS, Typescript, Vue.js, angular.js, Bootstrap, Figma.

Backend — Spring Boot, Node.js, Express.js, Hibernate, Spring Security, JWT, Kafka, Redis, JUnit, Maven/Gradle, Twilio, REST APIs

Databases & Tools — Kafka, Jenkins, Swagger, Docker, Git, GitHub, Tomcat, Postman, JUnit, PyTorch, Kaggle

Database — MySQL, Redis Cache, PostgreSQL, MongoDB

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | ElevanceSkills Technology Pvt. Ltd
July 2026 — October 2026 | Remote
- Developing a full-stack travel booking platform using React, Spring Boot, and MongoDB as part of a project-based internship program.
- Implementing REST APIs, real-time flight tracking, booking and cancellation workflows, and responsive UI with Tailwind CSS.

Java Development Intern | CodSoft
Jan 2026 - Feb 2026 | Remote
- Completed 5 Java development tasks covering core Java, OOP principles, and application logic as part of a structured internship program.
- Submitted all projects within deadline and received completion certificate upon successful evaluation.

PROJECTS

EcoBounty - Smart Civic Issue Reporting Platform
Winner - Best Solution - Techathon 3.0 | 500+ teams | 1,600+ participants | ₹10,000 Prize
Tech: React - Node.js - Python - Whisper API - OpenRouter API - MetaMask - Web3.js - REST APIs
- Built both the frontend input interface and full backend pipeline, connecting audio/video capture to Whisper API and OpenRouter AI summarization.
- Implemented automated SOS dispatch routing civic reports via email to municipal authorities, reducing manual escalation to zero.
- Delivered complete end-to-end product within 24 hours, validated across 15-20 full-cycle test reports.

Broadsheet – Hackathon Submission & Judging Platform
Winner : 3rd Place - DogFood2026 | 195 projects | 3500+participants | $350 Prize
Tech: Python - FastAPI - PostgreSQL - SQLAlchemy - Alembic - Jinja2 - Argon2 - Docker - REST APIs - Webhooks - pytest - Railway
- Built a full-stack hackathon platform with role-based access for organizers, judges and participants, covering team formation, deadline-enforced project submission, and a public gallery.
- Implemented judge assignment, weighted rubrics, cross-judge score normalization, and backend-enforced score isolation between judges with audited denials.
- Developed a REST API with HMAC-signed webhooks and a pytest suite, deployed with Docker Compose and PostgreSQL on Railway.

EventHub - Smart Event Ticket Management System
Tech: Java - Spring Boot - Spring Security - Keycloak - React - PostgreSQL - Hibernate - JWT Authentication - Docker - REST APIs - QR Code Generation

- Developed a full-stack event management platform with role-based access control for event creation, ticket booking, and inventory management.
- Implemented Keycloak authentication, QR-code ticket validation, and concurrency handling to prevent ticket overselling.
- Built a React frontend integrated with a Spring Boot backend and PostgreSQL database for ticket purchasing and event check-in workflows.

TripNest - Travel Booking Platform
Full-Stack Internship Project | ElevanceSkills Technology Pvt. Ltd
Tech: Java - Spring Boot - Spring Security - React - Tailwind CSS - MongoDB - Docker(PostgreSQL) - Hibernate

- Developed a full-stack travel booking platform with React frontend, Spring Boot REST APIs, and MongoDB persistence, supporting flight and hotel booking workflows end to end.
- Implemented real-time flight tracking with dynamic status updates, delay information, estimated timings, and automatic status refresh.
- Built responsive reusable UI components with Tailwind CSS and integrated backend services for booking, cancellation, and persistent application data.

ACHIEVEMENTS

Best Solution Award — Techathon 3.0 22/02/2026
Winner among 500+ teams and 1,600+ participants | ₹10,000 Prize

3rd Place — DogFood 2026 18/10/2026
Winner among 195 teams and 3,500 participants | $350 Prize

Best Solution Award — Pandora Hackathon 28/02/2026
JSPM's BSIOTR, Pune

Top 11 Finish — RIFT Hackathon 2026 11/07/2026
Ranked in the Top 11 teams among all participants over a 24 hours hackathon.

CERTIFICATIONS

Spring Boot 4, Spring 7 & Hibernate for Beginners — Udemy(Chad Darby)

MongoDB Node.js Developer Path — MongoDB University

Artificial Intelligence Fundamentals — IBM SkillsBuild

EDUCATION

Bachelor of Engineering - Computer Engineering 2023 – 2027
Bhivarabai Sawant Institute of Technology and Research, Pune Pune
CGPA: 8.6

Higher Secondary (12th) Pune
Don Bosco Junior College, Pune

Secondary (10th) Pune
Don Bosco High School, Pune
